OBJECTIVE

Full Stack Developer with hands-on experience in web application development, microservices, and risk management operations, seeking to leverage strong technical foundation and analytical skills in a dynamic software development role.

EXPERIENCE

Operations Risk Management Associate

Amazon Veddel

Dec 2024 - Present

Hamburg, Germany

- Monitor and analyze delivery service partner (DSP) performance metrics using Mercury platform
- Conduct regular risk assessments and trend analysis for delivery operations
- Collaborate with Delivery Service Partners to track and improve driver safety metrics
- Maintain compliance documentation and generate performance reports
- Utilize data analysis tools to identify operational risks and areas for improvement
- Support implementation of risk management protocols to enhance delivery operations safety
- Participate in daily operational reviews to assess and mitigate potential risks

Software Developer Intern

ewo GmbH

Sep 2022 - Jun 2023

Bolzano, Italy

- Developed and maintained a web application using React.js and Spring Boot, reducing process times by 80%
- Implemented RESTful APIs for system integration and designed microservices architecture
- Built automated testing suites and maintained CI/CD pipelines using Git and Docker
- Collaborated in an agile team environment, participating in code reviews and sprint planning

EDUCATION

Bachelor of Computer Science, Free University of Bolzano

2021 - 2025

Relevant Coursework: Software Engineering, Web Technologies, Distributed Systems, Database Management

Technical High School Diploma, Istituto di Istruzione Superiore Alfredo Ferrari

2013 - 2018

Focus: Technical specialization in system maintenance and engineering principles

SKILLS

Frontend Development

JavaScript, TypeScript, React.js, HTML5, CSS3, TailwindCSS

Backend Development

Java, Spring Boot, Node.js, RESTful APIs

Database & Tools

MySQL, PostgreSQL, Git, Docker, CI/CD

Data Analysis

Risk Assessment, Performance Metrics, Trend Analysis

Languages

German (B2), English (C1), Italian (C1)

CORE COMPETENCIES

- Strong analytical thinking and problem-solving capabilities in software development and risk management
- Experience with agile methodologies and collaborative development practices
- Data-driven decision making and performance tracking
- Stakeholder communication and cross-functional collaboration
